

AC7500

Cash and Coin Recycling System

The AC7500 Cash and Coin Recycling System optimizes cash operations

for cash-intensive businesses, reducing costs by eliminating manual cash counting and handling. The AC7500's state-of-the-art cash automation technology makes cash transactions, reconciliations, and deposit preparation faster, and more accurate and secure than ever before. Best of all, it pays for itself in terms of efficiency gains in as little as 12 months.

Maximum efficiency

The AC7500 maximizes operational efficiency by eliminating the need for multiple employees to count and verify cash throughout the day. It accepts, dispenses, and validates cash and coins, eliminating manual cash handling and counting, and freeing your managers to focus on day-to-day operations. It also dispenses starting tills and accepts end-of-day deposits.

Our exclusive Transfer-to-Multi (TTM) function prepares bank deposits automatically—no

manual cash handling required. The AC7500's advanced software lets you monitor your cash inventory securely from any location, putting the entire cash room at your fingertips and enabling visibility of cash and coin status in real time.

The AC7500 lets you transfer funds into one deposit cassette for automated bank deposit preparation. Optional secure cassette storage ensures that deposits are protected at all times. The deposit cassette area can also be locked independently to prohibit access by anyone

except your armored carrier.

All of the AC7500's functions can be carried out independently, without manager verification. It validates funds with 100 percent accuracy and enhances security significantly. Cashiers are the only ones handling their cash; with the AC7500 performing all counting and verification, the need for investigations regarding employee accountability are greatly reduced.

Comprehensive reporting

The AC7500 makes full inventory accounting for checks, coupons, and vouchers easier than ever. You can obtain detailed reports and custom alerts by text or email. You can even set up custom alerts to notify you when the unit needs service. Comprehensive reports are exported in your preferred format for effortless balancing of POS systems. The AC7500 makes investigating cash variances simpler and more accurate than ever before, and its software is customizable to your specific needs.

Simplified operation

The AC7500 is simple to operate, with just four buttons: 1. start, 2. make change, 3. mid-day drop, and 4. end-of-day. Just log in and press a button, and the AC7500

PUSH BUTTON EASE Once logged in, cashiers only need to press a single button to dispense bank deposits in less than 60 seconds. Depositing cash and coin, and performing mid-day functions is just as easy. The AC7500 allows users to deposit 300 notes at a time, more than with any other cash-management product on the market. It simultaneously processes cash and loose coins, saving even more time.

automatically dispenses the user's pre-assigned bank. Coins are dropped directly into a till tray and cash is dispensed in neat, sorted stacks. Making change, validating mid-shift deposits, and dropping bank deposits at end-of-day are all achieved quickly and easily with the press of a button.

Innovative software

Even though it's powered by the most innovative software on the market, the AC7500 is extremely user-friendly, with processes streamlined to minimize effort. A cashier can dispense a till in two or three steps, and less than one minute. Managers can create bank deposits in 15 minutes or less.

The AC7500 has one of the most advanced back-office software packages on the market, allowing managers to view real-time inventory levels and transaction details on any PC. Managers can also be notified of open tills, send customized status alerts, and access a variety of reports in any format.

| TECHNICAL SPECIFICATIONS | |

Powerful benefits

- Real-time cash monitoring
- Fast, easy transactions
- Efficient deposit preparation
- Detailed customized reports
- Superior cash protection and accountability
- Reduced errors
- Increased productivity

With efficiency gains, many companies have seen ROI in as little as 12 months

AC7500 Coin Hoppers

Faster transactions, greater capacity

The AC7500's next-generation cash handling technology powers more than 300,000 installations worldwide and delivers the highest available transaction speed and cassette capacity. Its higher capacity cassettes can also be split for greater denomination support. Split recycler cassettes offer dual denomination functionality, for unlimited cash-handling options.

The AC7500 provides easy clearing of jammed notes with quick access to the currency path. The dual hoppers in the coin vault have a capacity of more than 29,500 coins. With a built-in receipt printer and an intuitive touchscreen, users can log in with magnetic stripe card, unique PIN, or barcode.

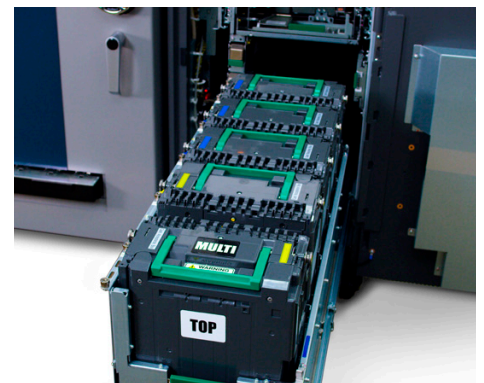

Experienced support

The AC7500 is fully supported by Socal Safe, whose widely respected expertise in cash handling and security solutions spans more than 100 years. Our support ensures a trouble-free experience for your business. We offer a variety of maintenance packages, including 24/7/365 phone support, parts and labor, and more. We'll even train your staff to maintain the system. We will also help you develop procedures to optimize efficiency and maximize savings.
